Dear Ms. Henney,

As a concerned consumer and a member of CSPI, I am writing to urge you to prohibit livestock producers from routinely adding medically important antibiotics like vancomycin and Synercid to animal feed to promote growth. It doesn't take a degree in science to make the connection between resistant bacteria and the overuse of these antibiotics. Isn't there any measure of common sense going around in government these days or does the bureaucracy just not care?

Let the people know you have our best interests in mind by disallowing this common practice.

Yours truly,

Sandra Weiss
