Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1

X All GE foods should be labeled so I am informed and have a choice.

X GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing

X There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

(Additional Personal Comments:) This should be at the top of your agenda.
