Alaska's Prince William Sound is a wild biological treasure-trove home to sea otters, harbor porpoises and humpback whales. NWF is working to protect the Sound from unregulated development and safeguard the long-term health of this spectacular ecosystem.

Re: Docket No. 98P-0151/CPI
(Downed Animals)

Dear Sir or Madam

I urge the US FDA to prohibit the slaughter of downed animals, which suffer terrible cruelty at slaughterhouses. I strongly urge better, more humane care for such animals and incentives for the industry to ~~stop~~ prevent downed animals in the first place

Sincerely,
Irene Cannon-Geary Ph.D
