Dear Dr. Hennney

0476 '00 DEC 11 A9:52

I was very upset to learn that Lotronex would no longer be available. For forty years of chronic unpredictable bouts of diarrhea, Lotronex has been the only source of consistant relief. I took one pill about four days a week. Perhaps some people's problems were from too high a dose. Why not recommend lower dosing before withdrawing Lotronex?

I hope you will reconsider this decision

Sincerely,

[redacted]
