Zoning To Humanize Our Cities

5800 '02 AUG 26 A9:50

August 14, 2002

Ref: Docket 01P-0230

Greetings:

Our family is concerned about fish. While we like eating it, cheap, we are worried over the essentially primitive nature of farming and genetic development.

There have been plenty of accounts of fish escapes on both coasts, which have led to damaging genetic alterations of wild stocks.

There has also been precious little testing of allergic and toxic reactions to genetic modifications.

We request that the FDA:

1. Place a moratorium ~~of~~ on the sale of GE fish until they have been adequately tested;
2. Prohibit farming of GE fish until strict standards are imposed on farm facilities.

Respectfully,
William A. Collins

01P-0230
