Aug 16, 1999

Dear Mr Reuter,

I read with interest an article in "Substance Abuse Report" regarding the lessening of restrictions for methadone maintenance treatment. (Aug 15, 1999). I believe this proposal is long overdue and a definite move in the right direction. Drug addiction is a medical condition and needs to be seen this way by people who can make a difference.

The article mentioned I could get more information on this subject by contacting you. I would truly appreciate anything more you could send me. Thanks

Sincerely,

Richard Lunden
