Commissioner Jane Henney
FDA Dockets Management Branch
Rockville MD 20852

Dear Ms. Henney:

Concerning Docket Number 00P-1211 00 JUN -1 P3:44
0684

I believe genetically modified food should be

1) tested by an outside, independent organization for health and environmental impact;

2) labelled as Genetically Modified, preferably describing where the modified genes came from.

I believe both of these issues are very important.

I believe we have learned from cigarette manufacturers, who still claim that cigarette smoking is safe, that testing performed by the same company which profits from selling the product is not to be trusted.

I believe that the ever-rising cancer rates are due to poor diet and poor environment. I prefer not to ingest poisons into my body, including abstaining from foods registered as pesticides.

We have the right to know what our food is made of!

Sincerely,

Susan Lincke

00P-1211
