I strongly support the California-based Environmental Health Network's petition to have Calvin Klein's eau de parfum "Eternity" declared misbranded because it contains toxic ingredients. In fact, I wish you would analyze all fragrances. I know you will find toxic ingredients in many of them.

Many fragrances burn my nose, make me sneeze, give me headaches, chest pain, shortness of breath, light-headedness, nausea to name a few symptoms. In fact, I can rarely go out in public anymore, fragrances are so ubiquitous.

Thank you for your consideration

Connie Sachs
