Re: Docket No. 98N-1038, "Irradiation in the Production Processing, and Handling of Food"

3818 '99 JUL 19 P5:23

To whom it may concern:

I personally care to know what I put in my body (you are what you eat) idea. Thats why I'm concerned that ~~the~~ irradiated food ~~is being~~ could be sold with out labels.

~~These foods and any other~~

Irradiated food needs to be clearly labeled so consumers know what they are paying for. The labels shold be straight to the point, easily readable so people know.

The federal law has made sure consumers know what they are buying with all other products (we assume) since the FDA got started.

Please be honest to the public concerning one of the most important parts of ~~life~~ animal life, food consumption.

Sincerely,
Heather Laundrie
