Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically-engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1

☑ All GE foods should be labeled so I am informed and have a choice.

☑ GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

(Additional Personal Comments:)

The need to do this NOW is great. The quality of our Health, every man, women + child, is at stake. Especially the very OLD and the very YOUNG!
