Dear Commissioner Jane Henney -

I have been Researching the effects of Genetically Engineered (GE) food and have worthy concerns. I choose to eat organic and I realize now that GE agriculture puts organic food at risk. The organic crops are being contaminated by "genetic drift". How aweful to think that when I make a choice to eat live healthy food, It has truly been contaminated I have no idea our freedom is being stole from us. GE food is a significant threat to the enviornment, ourselves and our grandchildren. I am not alone with these concerns. Individuals with ethical or religious dietary concern may be unwittingly consuming foods that contain genes from other species. Studies show GE food could create new toxins, antibiotic resistance, allergic reactions and other dietary risks for consumers, and therefore should not be "generally recognized as safe (GRAS)" What are we doing to ourselves? Our Mother Earth?

C 700

I pray that we might put an end to this disgrace. But as it may already to late, I ask

- That all GE food be labeled to give us a choice.
- For a moratorium on all GE food since there are <u>no</u> requirements for long-term studies exploring their impact on human health or the environment. (This would get anyone to stop eating it, I think, or a least hope.)
- Mandatory pre-marketing safety testing on all GE foods.

I hope + pray that we can make a difference on this beautiful earth and choose love instead of fear. That we might be able to give to our grandchildren a home they will be grateful to have instead of utterly disgusted with us, only to be left crying for a better world. Please read <u>Awaking Spirits</u>, Tom Brown Jr. Native American Prophecies that will awaken the reality of what we are doing to our selves.

♡ Peace Love & Respect ☺ Happiness <u>Sarah Sterner</u>
