COMING CLEAN

Should companies that bottle water offer consumers the same detailed reports of contaminants that public water utilities must? Yes, says the Food and Drug Administration. No, says the bottled-water industry. If you think consumers have the right to know what they're drinking, you can help by signing and mailing this coupon or writing your own letter.

Consumers have the right to know what's in their bottled water. As a member of the Center for Science in the Public Interest, I support the FDA's proposal that bottled-water manufacturers be required to make available detailed reports of contaminants, just as public water utilities do. All bottled-water labels should also disclose where the water comes from.

Some of these companies are just selling tap water!!!
