Dear Commissioner Henney,

I refer to docket (#00P-1211/CP1) and request that we thoroughly test genetically engineered grains etc. before we use them in food.

I have a right to know what is in my food, so I want labels telling me what food has GMOs in them.

We have no proof these altered products are good for us in the long run. Please don't put us all at risk.

Thank you —
Lou Tryon
