I would love to have a detailed report of contaminants in my bottled water. I drink Deer Park Water Drinking Water which is well water from the Floridian Aquifer. I would like to know if it is safe.

Consumers have the right to know what's in their bottled water. As a member of the Center for Science in the Public Interest, I support the FDA's proposal that bottled-water manufacturers be required to make available detailed reports of contaminants, just as public water utilities do. All bottled-water labels should also disclose where the water comes from.
