Consumers have the right to know what's in their bottled water. As a member of the Center for Science in the Public Interest, I support the FDA's proposal that bottled-water manufacturers be required to make available detailed reports of contaminants, just as public water utilities do. All bottled-water labels should also disclose where the water comes from. Also, I'd like to know whether or not they are members of the International Bottled Water Assn. I'd feel better about our water if I knew we were well protected from contaminants and diseases they bring. Thank you. D. Kreiselman 5/26/2000
