Yes. we use Kentwood Bottled water.

Consumers have the right to know what's in their bottled water. As a member of the Center for Science in the Public Interest, I support the FDA's proposal that bottled-water manufacturers be required to make available detailed reports of contaminants, just as public water utilities do. All bottled-water labels should also disclose where the water comes from.

We at the end of a Public line. and the water tastes terrible. and also I have a very sensitive stomach. Most bottled water doesn't taste good either.
