Ms. Smith -

It is a tragedy and a disaster that the U.S. Govt is requiring Calcium Hypochlorite to disinfect seed production relative to the growing of sprouted foods. This renders them poisoned with pesticides and virtually puts sprout producers out of business. These brave people are producing practically the only pesticide free foods in this country. The government should support them — not undermine them.

Please remove Section 18 from the Food Safety Provision Act (21 U.S.C. 301-397) at once!

99D-4488 Most sincerely, Daphne Rose Finger
