April 13, 2000

Dear Commissioner Jane Henney, M.D,
I am opposed to antibiotics as growth promoters in livestock and urge the FDA to immediately ban animal use of growth promoting antibiotics used in human medicine,
Wake-up FDA! Follow the European Union. In 1998 the E.U. banned antibiotics important in human medicine from use as growth promoters in livestock Production,
Lets PUT Public health ahead of Commercial interests. The F.D.A protects the public, Right??

Sincerely,
Carol Caputo
