RE: Use of antibiotics in animal Feed

2502 '00 AUG 16 P2:25

Dear Commissioner Henney,

We urge you to save human lives by banning the use of medically useful antibiotics in animal feed.

Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics — and that can leave physicians with no way to treat life-threatening bacterial infections in humans.

Banning this practice is essential to our survival!
