RE Docket No. 00P-1211-CP1

8 August 2000

Dear Ms Heavey,

I am writing to express concern about what I understand to be FDA's position relative to genetically altered foods. All genetically engineered foods ought to be rigorously tested before being marketed and clearly labelled in any market. The impact of consumption overtime IS UNKOWN. I don't want my family to be the tests! And will avoid buying genetically engineered foods.
