(GE CROPS?! AAAUGGGHHH I'M DYING!)

Dear FDA, It's the 21st Century, for God's sake, we can't afford safe food!

I am writing to express my ~~concern~~ distress over the FDA's regulation of genetically engineered (GE) food, to ask that the agency's current policies be changed, ~~and~~ immediately to support all the points in docket # 00P-1211/CPI, specifically:

- All GE foods should be labeled so I am informed and have a choice. I believe you have a right to commit suicide on GE food if you wish. And I have a right not to.
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing. You treat us as if we were a nation of morons
- There should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment, or since GE has already proven itself unsafe + uncontrollable, save the study money, + ban GE shit!

GE Food Moratorium Petition

Little Marais, MN 55614

Additional Personal Comments:

If you sanctioning GE instead of banning it, attempting to gut state organic standards, stonewalling morning after pill; who will protect US from the F.D.A.?
