DEAR Sirs or Madame;

I called a number given, 301 594-5400, as soon as I heard on the news that some drugs - that are now prescription drugs, may be considered to become O.T.C acquired. I may be too late, however, it is worth a try!

I take Lescol and would be so very happy not to have to renew my Rx. on a yearly basis. Medications are so very expensive.

The other medications, which would be phenomenal, would be some 'Eye drops' (73.0 FDA 15) for Glaucoma (which I take) and Ear drops for some allergies - ie Ear [illegible]

OON-1256 CH 151

* I am a Registered Nurse & am very aware of the importance of follow up care - ie: regular check up for Intra-ocular

pressure — etc — I recall when Benadryl was made O.T.C. & it seems there have been no 'problems' with 'abuse' of it — also with Pepcid — & other Antacids!
I am 65 — have had to go back to work (retired @ 62) to assist with paying for 'eye drops' etc — Pharmaceutical Companies are making too much — far too much — of a profit!

Thank you so much —
