If you observe you'll see the [illegible] eating public is increasingly shifting to organic sustainably food even with the higher costs which will down if supported w/ policies to encourage sustainable agriculture

Dear FDA,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food, to ask that the agency's current policies be changed, and to support all the points in docket # 00P-1211/CPI, specifically:

- **All GE foods should be labeled so I am informed and have a choice.**
- **GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing.**
- **There should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment.**

20USA

**GE Food Moratorium Petition**
**c/o Organic Consumers Association**
**6114 Hwy 61**
**Little Marais, MN 55614**

Additional Personal Comments: Why not focus on producing food sustainably instead of damaging the earth's soil and plant & animal life further. Stop working for corporate business interests and start working for the people who want healthy food and food systems that foster community, local small size ownership of agricultural production
