May 2 2000

Dear Sir:

2085 '00 JUN 30 A9:50

I do not approve that the government has yielded to pressure from the meat industry by promoting radiation, rather than cleaning up filthy conditions at large corporate farms and industrial packinghouses. While the rule mandates labeling for irradiated meat and poultry, sold at retail, it doesn't require such labeling for food served in restaurants hospitals or school cafeterias.

Sincerely
Dorothy H Oates
