Dear Mr. Levitt, July 8, 2000

Consumers have the right to know what's in the bottled water they buy. As a member of the Center for Science in the Public Interest, I support the FDA's proposal that bottled-water mfgs be required to make available detailed reports of contaminants, just as public water facilities do — and all bottled-water labels should also disclose where the water comes from and what contaminants are still present. AEP.
