Hey - what's up with these rBGH stuff anyway? If we have found that extra hormones (espescially manmade ones) are bad in our bodies, why is it in our food? This is dumb. While we're at it, lets do something about Monsanto's monopoly (almost) on world food production. The people need to control them - and we do the best we can, but we need your help. - Sincerley M. Considine
