***Trans* fat is a hidden killer in our food supply. As a member of the Center for Science in the Public Interest, I strongly support the FDA's proposal to require that *trans* fat be included in with saturated fat on food labels (with a footnote that reveals the amount of *trans*). The FDA should keep the current Daily Value for saturated fat, and should limit the amount of *trans* fat in foods that make claims like "low in saturated fat," "cholesterol free," or "lean."**

Trans fat shown only in I don't believe it's not better
