RE: Petition to Prohibit the Slaughter of Downed Animals
Docket No. 98P-0151/CP 1

I, and many others I know, do strongly urge you to pass this bill.

Downed animals often are in need of euthanasia (or) care to get well, rather than more suffering by way of being slaughtered.

Additionally, human consumption of downed animals is thought by some to bring on illness due to the various conditions of the "downers".

So, do the right thing by approving this petition.

Thanks.
