DEAR DR HENNEY —

THERE ARE VERY FEW THINGS IN LIFE I KNOW ARE WRONG. GENETIC ENGINEERING IS ONE SUCH THING. HUMANS ARE SIMPLY NOT WISE ENOUGH TO BE DIDDLING W/ THE FABRIC OF LIFE. WE ARE EMBARKING TOWARDS A BRAVE NEW WORLD WHICH IS CHILLING IN ITS POSSIBILITIES.

TO THE CORE OF MY BEING, I BELIEVE:

① HUMANS SHOULD NOT BE ENGAGED IN GENETIC ENGINEERING;

② SINCE WE ARE THOUGH, AND PRODUCTS THUS TAINTED ARE ALREADY ON THE MARKET IN MASSIVE QUANTITIES, IN THE FUTURE:

Ⓐ ALL FOOD W/ ANY GENETICALLY MODIFIED ELEMENTS SHOULD BE CLEARLY MARKED;

Ⓑ INDEPENDENT SAFETY TESTING (RIGOROUS) MUST ASSURE NO DANGER TO HUMANS OR THE ENVIRONMENT;

Ⓒ BIOTECH COMPANIES MUST BE HELD FULLY RESPONSIBLE FOR ANY DAMAGE THEIR PRODUCTS DO.

FDA'S CURRENT POLICIES MUST CHANGE. GE IS NOT THE SAME AS TRADITIONAL BREEDING. NEVER BEFORE COULD A TOMATO BE CROSSED W/ A SALMON. I DEMAND THAT THE POINTS IN DOC #: 00P-1211/CP1 REPLACE THE PRESENT CORPORATE GUIDELINES.

SINCERELY, SANDRO MORO
