Dear Sirs,

I ask that you prohibit the slaughter of downed animals.
Animals sick or injured do not belong in the food chain.
They increase the risk of contamination, including Mad Cow Disease.

These downed animals are Cruelly moved by being Dragged or pushed by tractors.

90% percent of Downed Animals can be prevented with better care. ~~This would ensure~~
Removing downed animals would provide a incentive for the industry to prevent downed animals in the first place.

Best Wishes
Bernard Caley
