Clean up your Act FDA 8/26/2000

If you did your jobs — forcing food production to be done in a healthy manner — Then irradiation & other Sterilization schemes would not have been dreamed up. My guess is That This scheme is The result of needing to hide or get rid of some stockpile of "hot" material left over from some experiment. It's been done before & I have no doubt That our govt is involved in many of These deceits to The public.

Shoddy mass production is unacceptable & sterile products only promote & exacerbate The problems, not solve them. We are moving back to community farming. Down with corporate control — I won't eat your lousy eggs. Nancy Zierenberg
