Re Docket No
99D 0557

Dear Sirs:

I recently became aware of the proposals to use Xenotransplants, and I wish to support those who object to these proposals. Until there is much more absolute evidence that viral transmission between species. This country has suffered enough from viral infections and we have a very mediocre effort in fighting them. Europe has urged a world ban on Xenotransplants; we should do so also.

Sincerely,
Mother Christopher OSA
