FDA Commissioner
Jane E. Henney

2812 '00 JAN -6 PM12:22

Dear Ms. Henney:

Please make every effort to prohibit livestock producers from routinely adding medically important antibiotics to animal feed to promote growth.

We have known for years that this practice causes bacteria to become immune. It is hard to understand the government's reluctance,

99P-0485

C 1896

to ban this practice as has the 2-
European Union.

This is a scary situation.
Please do what you can for my
children and grandchildren and
all the natural kids.

Thanks

Lizzie F. Meister

Please respond to this letter.
