Docket 99P-0033/CP1 June 22, 1999

1100 '99 JUN -3 A8:29

To FDA Commissioner Jane Henney,

This is re: feeding dead pigs, horses etc. to other farm animals. Cows are not meat eaters by nature & they shouldn't be forced to eat dead animals.

BSE (British mad cow disease) is linked to feeding dead animals to livestock. This is happening in the U.S.

To date 33 people have died from (nv CJD). The cattle were infected with BSE. It has a long incubation period. People who have dementia have a high level of CJD.

So I would like

1) Blood & its products must be prohibited from animal feed.

99P-0033 C 321

2. Gelatin & its by-products must not be used in animal feed.

3. TSE positive material must not be fed to animals or used in cosmetics or fertilizer.

I would appreciate an answer to this letter.

Maxine Jaffee
