Re: CSPI Petition

I am writing to request that you support the CSPI Petition against sub-therapeutic uses of antibiotics in livestock. Europeans are already phasing out antibiotics used by humans as a regular animal feed ingredient. The health of our nations' citizens is more important than economic gains for farmers and ranchers. Richard Wood, director of Food Animal Concerns Trust (FACT) says "If farmers provide cleaner barns, better feed, and more floor space per animal, they can reduce stress and illness while maintaing growth. This is very important to me, my partner and our 2 children. Dkyser
