FDA Commissioner Jane E. Henney

Dear Commissioner:

'99 JAN -6 AM 11:56

Please act quickly to prohibit antibiotics (that humans need to fight horrible diseases) from being added to animal feed. This is contrary to all common sense. Has anyone in this government checked with the medical community to have an expert opinion – rather than with producer's profits?

Drug resistant diseases are rampant – don't take away our few remaining defenses.

Thank you.

Very truly yours,
Len & Lois Amlow
