Dear Dr. Henney,

I am writing to urge the F.D.A. to ban human antibiotics in animal feed and to rescind its approval of genetic engineering in our foods. Our government agencies must stop thinking that they understand the intricate workings of the natural world; they must stop caving in to various industrial as well as political pressures and truly protect the American public. The F.D.A. cannot protect us and allow the above-mentioned practices to continue. It may be already too late for myself, but please think about our children here & to come and help them. Thank you.

Sincerely,
Karen B. Dantinne
