Dear Madam:

The use by farmers of antibiotics has caused we consumers, through eating the meat and poultry products, to develop strains of resistance to antibiotics. This renders use by us of antibiotics to fight disease to be ineffectual in preventing disease.

I urge you to put restrictions on such use by the farmers. The European Union restrictions are a good example of what needs to be done

My phone number is 954 966 6297

Sincerely

Victor Levin
