Dear Dr Henney,

I am appalled that antibiotics & hormones are being used in our livestock, as well as all the other additives being added to our food chain (genetically altered corn, grain etc) without really understanding risks. And not properly labeling so that the public can choose what to purchase etc. (over)

99P-0485

C2402

no wonder we have an abundance of resistant bacterial strains now; 3 cheers for Europe delaying the purchase of our beef—. I want to go on record to encourage a ban on this practice!

Sincerely,

Barbara Sawyer, RDH
