January 13, 2000 (Re: DOCKET NO. 99D-5347 (XENOTRANSPLANTATION and the BLOOD SUPPLY)

Dear People at FDA:

* PUBLIC COMMENTS *

The precautionary measures you propose to reduce the possible risk of transmission of zoonoses incapable of protecting the nation's blood supply.

1124 '00 JAN 21 A10:07

Xenotransplantation is not only unhealthy for the human species (i.e., reliance on animal body parts to rebuild our own, rather than utilizing disease prevention & building health within our own species), it will (and probably already has) endanger our blood supply, which is an important human resource commodity.
