Trans fat is a hidden killer in our food.
As a concerned citizen of the Center for Science in the Public Interest, I strongly support the FDA's proposal to require that trans fat be included in with saturated fat on food labels (with a footnote that reveals the amount of trans). The FDA should keep the current Daily value for saturated fat, and should limit the amount of trans fat in foods that make claims like "low in saturated fat", "cholesterol free", or "lean."
