Jan 6, 2000

Dear Sir:

734 475 7763

5995 '00 JAN 13 P3:29

It has come to my attention that there is a lawsuit, involving (rBGH) a growth hormone, as the only one to benefit from this is Monsanto & they have done their best to keep from showing true tests & hiding the results of ones unfavorable to them. & there is every reason to believe black people is the main could be adversely affected & their deaths speeded up & there is no proof it will not harm others, I think the sale & use of this drug should be suspended until completly proven safe. As the ones who use this, dairy farmers are the ones who will suffer if proven to be bad, it is incumbent on you to use your power now.

Sincerely,
Roland [illegible]

99P-4613
