Dec 20 1999

Dear F.D.A.

I urge you to withdraw "Posilac" from the market immediatly due to the serious question of safety of milk from cows injected with it.

The product now used in "Posilac" is significantly different than the product that was approved.

a whole new set of testing on cows and human should be done before this product is put in every one's diet as is now the case.

Thank you very much.

Sincerly
