Dear Sir:

I'm 100% in favor of an amendment that would require listing of trans fats in foods to be separately listed in the "NATURITION FACTS" panel of labels.

I have been avoiding foods that have been ~~hydrogenated~~ partially hydrogenated w/oil for the last 30 years or more.

I'm sure that the reduction in use of TRANS FATS would reduce strokes, heart attacks and circulatory occlusions in other organs, such as lungs, extremities and sense organs.

Sincerely,
Cliff Stein
