Re: Docket # 94P-0036

In regards to the above proposition, we want to encourage the FDA to pass it, if the people in the FDA truly care about themselves, and the rest of the people in the USA. We feel that research on TFA's warrant, at the very least, their being listed as such, (and the amounts) on food labels; so that we can protect ourselves, if we so choose (via our democracy), from putting toxic, unnatural TFA's into our bodies through the foods we eat.

If saturated fats are listed, trans fatty acids should definitely be there also. We absolutely support this proposition, and seriously encourage the FDA to do the right thing and make it a requirement to list TFA's on ALL food labels.

Thank you.
