Dec 30-99

F.D.A. Docket # 94P-0036

My husband has high Cholesterol and I read labels as much as possible.

The FAT Content is confusing, the breakdown never adds up to total fat.

Since Trans fats are the most dangerous to our health I would like to see a requirement that TRANS FATS be listed on labels along side saturated fat.

Now there is no way to know how much trans fat is in any product. This is so very important to everyones health.

Sincerely
Geraldine Lasniewski
