Re: Docket # 97N-484S, Suitability Determination for Donors of Human Cellular and Tissue-Based Products

TO WHOM IT MAY CONCERN:

Dear Sir or Madam,

The proposed regulation (Docket # 97N-484S) regarding donor oocyte by the FDA is another example of Government practicing medicine without a license. It also reflects an emotional approach to a medical problem and it is indeed arbitrary and without any scientific basis. This proposed rule is nothing more than an impulsive and emotional selective regulation. Are you going to regulate heart, kidney or any other organ transplant program in a similar fashion? The criteria has to be uniformly applied in all walks of medical practice without prejudice. My opinion is that there is no rhyme or reason to the enactment of this regulation.

Sincerely,

Abraham K. Munabi M.D.
Medical Director
