Dear Sir:

I am very concerned about the rBGH hormone that dairies use. Fortunately, our local milk supplier guarantees that his cows do not receive the hormone, but I worry about my grandchildren who depend on store-bought milk.

Please
① Label all milk that comes from cows that receive rBGH.
② Stop Monsanto from selling rBGH until its effects are properly tested.

We are taking unacceptable risks for the health of our nation.

Sincerely,

Charlotte B. Lomberger
