To Jane Henney, M.D. Commissioner of USDFDA.

3629 '00 JAN -7 P1:45

I'm very concerned & upset about the use of bioengineered rBGH to boost milk production in dairy cattle in the U.S.! What is being done about this? The use of this increases incidences of cancer & antibiotic resistance bacteria!

How does bioengineered food "Frankenfood" become legal to sell when the actual food is no longer the food it was!! (FRAUD)

It is outrageous that these companies are getting away with murder.

These Genetically Engineered Foods must be labeled!!

The public must be educated!!

These companies must be responsible for their dire actions, they must pay the consequences of the dangerous effects of altering the genetic makeup of food.

Labeling Laws must be passed!

Please do what you can.
