Rockville, MD 20857

Dear Dr. Friedman;

I am writing to demand that you suspend Monsanto's license to sell rBGH immediately. There has not been sufficient proof that milk from cows treated with this hormone is safe for the nation's children to drink. Health Canada has recently exposed what many of us suspected all along:

- major gaps in the human safety review;
- FDA's approval of the drug was based on incorrect assumptions;
- test results showing significant health impact on test animals have been covered up.

As a mother of three and dependant upon food stamps, I cannot afford special milk at health food stores, yet I cannot poison my family with milk not safe to drink.

Sincerely, Heidemarie Huber
